Bruno Emme is an art gallery where children can expose objects that they love collecting in their pockets. The gallery is inspired by the work of two great artists: **Bruno Munari** and **Yayoi Kusama**.

Four tiles printed in relief with scientifically and accurate textures of insects. A book-theater printed on recycled paper. Few elements help the child to start the story and the discovery.

Discover an ancient printing technique. Improve the recognition of emotions. Six different faces engraved on wooden cubes. One iBook.

An hymn to children imagination.
Designed to create stories and fantasy worlds.
Inspired by the **Plus and minus** by Bruno
Munari.

What do we ask?

_We would like to collaborate with you organizing activities for children and families in your museum.

_We would like to share good practices with your staff.

_We would like to proposal training for teachers, parents and adults.

No cost is charged to museums.

We have italian public funding with the objective to make alliances in Germany.

Training with teachers and parents
